PROFILE

Third-year Computer Engineering student with a completed cybersecurity elective track and practical exposure to enterprise AI workflows. Interested in junior roles and internships across cybersecurity, AI and software engineering, primarily remote.

EXPERIENCE

AI Intern | Comtrade System Integration

Mar 2026 to May 2026

Belgrade, Serbia

- Completed a two-month, team-based internship with the AI team.
- Practised managing Microsoft Azure sandbox resources with Terraform.
- Explored vector storage and retrieval with Qdrant using synthetic data.
- Built and evaluated machine learning models with Python, XGBoost and AutoGluon.
- Gained insight into enterprise AI project workflows and delivery considerations.

Client and project-specific information is omitted in accordance with confidentiality obligations.

EDUCATION

BSc Computer Engineering | Računarski fakultet

2023 to 2027 expected

Belgrade, Serbia

Completed third year and the available cybersecurity elective track.

Sixth Belgrade Gymnasium

2019 to 2023

Specialized Computer Science and Informatics class

RELEVANT COURSEWORK

Introduction to Computer Security, Operating System Security, Software Security Testing, LAN Security, AI Applications in Computer Security, Web Services Security, Computer Networks, Operating Systems, Algorithms and Data Structures, Applied Artificial Intelligence

TECHNICAL SKILLS

Programming

C, C++, Python, HTML, CSS

Working knowledge

Java

AI and data

XGBoost, AutoGluon, Qdrant, machine learning fundamentals

Cloud and infrastructure

Microsoft Azure, Terraform

Hardware

Extensive custom PC assembly experience; hobby-level ESP32 device modification and experimentation

LANGUAGES

Serbian

Native

English

C1 Advanced (CAE), Cambridge English

ADDITIONAL BACKGROUND

Completed music school with piano as the primary instrument. Recreational basketball and table tennis player, with a longstanding interest in video games.
